## Project Design Phase-I Proposed Solution Template

Date	01 October 2022
Team ID	PNT2022TMID27851
Project Name	EARLY DETECTION OF CHRONIC DISEASE USING
	MACHINE LEARNING
Maximum Marks	2 Marks

## **Proposed Solution Template:**

Project team shall fill the following information in proposed solution template.

S.No.	Parameter	Description
1.	Problem Statement (Problem to be solved)	To predict the chronic kidney diseases early using machine learning by analyzing the dataset collected from the patient
2.	Idea / Solution description	Early detection of disease is necessary. As there is currently no cure. Thus, by using this application, the disease can be detected early so that the patient can change their lifestyle to control the effects of the disease.
3.	Novelty / Uniqueness	It helps the people to detect the disease earlier.
4.	Social Impact / Customer Satisfaction	It helps people to know about the disease earlier and it is cost efficient
5.	Business Model (Revenue Model)	It is user-friendly. This application is accessible to everyone.
6.	Scalability of the Solution	This application can be used anytime in convenience to the user.
